General Areas to be Aware of...

A Top Gem – Several dealers in this area. Top Gem normally wholesale only, but they're just kidding during the show. Don't miss the individual sellers right next door – lots of inventory. Also in this area are several outdoor locations with tents, filled with specimens from Morocco – cerrusite, fluorite, calcite. They are scattered about in various parking lots but well worth finding them all and visiting.

B FMS National Meeting – Feb. 14, 2020, Church of the Painted Hills
3295 W. Speedway, Tucson, starts at 6:00 PM
Minerals swap/sale, door prizes, auctions, special speakers, and food. Public invited

C - I-10 "Strip" Hotels - Long strip of hotels filled with roomfuls of dealers, many who have no clue what fluorescent minerals they have. Bring your light! Focus on the China and Afghan/Pakistani dealers, but everyone will have something to explore.

⑥,D - 22nd Street Show - Huge tents filled with random dealers – bring your lights and explore. China and Pakistan usually well represented.

E - Electric Park / Kino - Outdoor vendors, tents, filled with rocks, minerals, beads, native crafts – amazing specimens can be found here if you persevere. One large seller usually has a nice selection of Langban and Afghanistan.

①② - Miners Co-Op - Large group of outdoor vendors with lots of down-to-earth sellers who are usually also the collectors/miners. Many (most?) are from local mines, ranging from rare thumbnails to huge rocks. Very reasonable prices.

3 Hotel Tucson City Center (Inn Suites) - Great place to shop for higher end specimens, 100's of hotel rooms with dealers from all over the world. China, Pakistan, Australia a focus.
